

# RubberNeck™

Model No. 737

## Rubber Grunt Call

US Patent No. 5,910,039 & others pending

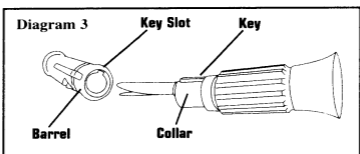

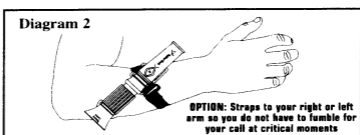

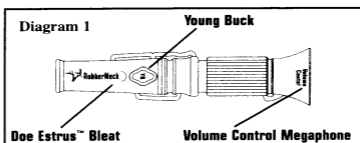

The RubberNeck™, with the push of a button, converts from a mature buck grunt to a young buck grunt or an estrus doe bleat. For the ultimate tone and volume control, just squeeze the megaphone end. You can use the call with the traditional lanyard around your neck or strap it to your right or left arm (See Diagram 2) so your call is easily accessible at those critical moments (lanyard and arm strap included). We are excited about having perfected this rubber grunt call for the avid whitetail hunter.

**IMPORTANT:** Please read all instructions and warnings before using this product to ensure safe and proper use.

### INSTRUCTIONS

The reed of the RubberNeck™ is preset to the mature buck position. To change the sound to the young buck grunt simply press and hold the "YB" button (See Diagram 1) and exhale. To change the sound to the doe Estrus™ Bleat simply press and hold the "k" in the word "RubberNeck™" (See Diagram 1). To change the tone and pitch, squeeze the megaphone end of the call (See Diagram 1).

When you disassemble the call, while the call is apart, moisten the collar for easier assembly. Be sure to align the key on the collar with the key slot in the barrel. Be careful when reassembling, not to bend or damage the reed when inserting in the barrel (See Diagram 3).

### FREEZEPROOF OPERATION

For freezeproof operation, you must operate this call by turning the call around backwards and inhaling through the Volume Control Megaphone (See Diagram 1). Inhaling prevents moisture, from your breath, from settling on the reed.

### EXERCISES

**Coercive or Attention Grunts** - a simple, short (about 1/2 to 1 second duration) grunt made by all deer. Simply exhale 2 or 3 times whenever you see a deer and are trying to get its attention so it will come closer.

**Tending Grunts** - a short, guttural sound of moderate volume all bucks make when calling to estrus does. Simply exhale 2 or 3 times to produce this series of grunts.

**Clicking Grunts** - are made by bucks as they prepare to breed a doe. This sound will drive nearby bucks crazy. Exhale sharply and quickly while saying "Tu-tu-tu-tu-tu...". Use this one-syllable grunt 10-15 times, pause 30 seconds and repeat.

**Doe Estrus™ Bleats** - are medium volume bleats used by a mature doe during the rut. Simply exhale while making the sound "meaaa" for about 2-3 seconds.
